SANTORIN 25

POWERFUL AND COMPACT

Powerful and compact, easy to integrate, the Santorin 25 is the ideal subwoofer for completing the lo2 system and for equipping a home cinema in a 50m2 room. The vertical 360° down-firing driver offers punchy bass, full of details and depth. It allows the placement of the subwoofer near walls and furniture with no acoustical compromise. In black or white, Santorin 25 is the subwoofer for audio systems that are discrete in size but impressive in performance.

Cabasse

SANTORIN 25

POWERFUL EFFICIENT WOOFER

The paper based membrane of the 25cm woofer enables clean reproduction at low and very high sound levels. Light but well damped, it provides quick and generous bass. Thanks to the high efficiency of the woofer and the 400 W peak power of the amplifier, Santorin 25 provides thrilling dynamic effects, full of realism on both music and home theater tracks..

360° SOUND EMISSION

The traditional, horizontal emission of subwoofers has been replaced by a vertical vent, down firing in 360°. The noise is filtered, the effects of internal standing waves are dampened, the positioning between the subwoofer and the wall is less critical, and the reproduction of bass is deeper and purer, always live and dynamic.

SPECIFICATIONS

Position	Floorstanding
Way	1
